AGRICULTURAL STATISTICS, IRELAND,

1907.

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Annual General Abstracts of the Agricultural Statistics for Ireland, which give, by Counties and Provinces, the acreage under Crops, and the numbers and descriptions of Live Stock in Ireland in 1907.

It should be stated that in order to make public at the earliest date the information obtained, the figures presented in this return are unrevised. A revised return will be issued as in former years in connection with the estimated yield of crops.

The following summary table shows the areas of land in 1906 and 1907 under the chief heads of classification :—

Tillage Area. The total net decrease in the area under corn and green crops and flax in Ireland in 1907 as compared with 1906 amounts to 40,698

acres, or 1.7 per cent. of the total area under these crops. This decrease has taken place chiefly in Ulster—the province which has the largest tillage area—and in Connaught—the province having the smallest tillage area. The decrease in Ulster amounts to 25,139 acres or 2.6 per cent. of the area under corn and green crops and flax in that province; the decrease in Connaught to 11,296 acres or 3.9 per cent. In Leinster and in Munster the net change in crops is small. In Leinster there is an increase of 167 acres in corn crops and a decrease of 2,631 acres in green crops giving a net decrease of 2,464 acres in corn and green crops. In Munster there is an increase of 2,825 acres in corn crops and a decrease of 4,624 acres in green crops giving a net decrease of 1,799 acres. The area under flax in Ulster shows an increase of 4,426 acres.

It is plain that the wet unfavourable season, especially in the North and West, has affected adversely the area under tillage, while the shortage of grass in many districts has increased the area grazed at the expense of the area of hay.

CORN CROPS.

The following summary shows the acreage under the several corn crops in 1906 and 1907:—

	1906.	1907.	Increase	Decrease.
	Acres.	Acres.	Acres.	Acres.
WHEAT.	43,880	38,151	—	5,729

TOTAL,	1,309,363	1,294,951	19	14,411
Net Decrease,	—	—	—	14,392 Acres.

Wheat.—The decrease of 5,729 acres amounts to 13·1 per cent. of the total area under wheat in 1906. It has taken place in each of the four provinces, but chiefly in Ulster, Munster, and Connaught, where the decreases amount to 2,786 acres, 1,472 acres, and 1,315 acres respectively. In Leinster the decrease was 156 acres.

Oats.—The decrease of 937 acres is equal to 0·1 per cent. of the total area under oats in 1906. There were increases of 5,173 acres and 5,942 acres in Leinster and Munster respectively; but a decrease of 10,682 acres in Ulster, and of 1,370 acres in Connaught.

Barley.—The decrease of 6,194 acres amounts to 3·5 per cent. of the total area under barley in 1906. It has taken place in Leinster, Munster, and Connaught, more especially in Leinster and Munster, in which provinces 95 per cent. of the barley in Ireland is grown. The decrease in Leinster and Munster amounted to 5,144 acres and 1,494 acres respectively. There was an increase of 830 acres in Ulster, and a decrease of 386 acres in Connaught.

Minor Corn Crops.—As compared with 1906 bere shows an increase of 82 acres, rye a decrease of 1,505 acres, or 14·6 per cent. of the area of that crop in 1906, beans a decrease of 128 acres, and peas an increase of 19 acres.

GREEN CROPS AND FLAX.

The following summary shows the area of green crops and flax in 1906 and 1907, and the increase or decrease in the several crops:—

Net Decrease,	—	—	—	32,366 Acres.

GREEN CROPS.

Potatoes.—The decrease of 25,134 acres is equal to 4·1 per cent. of the total area under potatoes in 1906. There is a decrease in each of the four provinces, but chiefly in Ulster where it amounts to 13,006 acres. The decrease in the other provinces is as follows:—Leinster, 3,478 acres; Munster, 2,924 acres; and Connaught, 5,726 acres.

Turnips.—The decrease of 3,238 acres is equal to 1·2 per cent. of the area under this crop in 1906. The decrease has taken place chiefly in Ulster, where there are 2,487 acres less than in 1906. There is a small decrease respectively in Leinster, Munster and Connaught.

Mangels.—There is little change in the area under mangels. There is a small increase in Leinster, Munster and Ulster, and a decrease in Connaught. The decrease in Connaught amounts to 10 per cent. of the area of mangels in that province.

Cabbage.—The decrease in the area under cabbage has taken place in each of the four provinces, but chiefly in Munster and Ulster, where decreases of 1,028 acres and 744 acres respectively are shown. The decrease amounts to 316 acres in Leinster and 500 acres in Connaught.

Minor Green Crops.—The area under carrots has increased by 1 acre. There is a decrease of 93 acres in beetroot, 167 acres in parsnips, 825 acres in vetches, and 207 acres in rape. "Other Green Crops," i.e., such as are not specified among the foregoing, show an increase amounting to 1,593 acres.

FLAX.

Flax.—The area under flax has increased by 4,466 acres, or 8·1 per cent. as compared with 1906. Out of a total of 59,655 acres in 1907 there were 59,412 acres in Ulster, the increase in that province amounting to 4,426 acres.

SUMMARIES BY PROVINCES.

The following Summaries show the main changes in the area under corn and green crops and flax by provinces:—

Leinster.

In Leinster there has been an increase in the area under corn crops amounting to 167 acres. Oats show an increase of 5,173 acres, barley a decrease of 5,144 acres, and wheat a decrease of 156 acres. Root and green crops show a decrease of 2,667 acres. Potatoes have decreased by 3,478 acres; turnips and mangels have increased by 249 acres, and cabbage has decreased by 316 acres. Flax has increased by 36 acres.

Munster.

In Munster the area under corn crops has increased by 2,825 acres. Oats show an increase of 5,942 acres, wheat and barley a decrease of 1,472 acres and 1,494 acres respectively. Root and green crops have decreased by 4,632 acres. There is a decrease in potatoes of 2,924 acres, in cabbage of 1,028 acres, and in turnips and mangels of 404 acres. Flax has increased by 8 acres.

Ulster.

In Ulster there has been a decrease in the area under corn crops of 13,181 acres, chiefly due to a decline of 10,682 acres in the area under oats, and of 2,786 acres in the area under wheat.

There is an increase of 830 acres in barley. Green and root crops have decreased by 16,384 acres. There is a decrease in potatoes of 13,006 acres, in turnips and mangels a net decrease of 2,448 acres, and in cabbage a decrease of 744 acres. Flax has increased by 4,426 acres.

Connaught.

In Connaught the area under corn crops has decreased by 4,203 acres. There is a decrease of 1,315 acres in wheat, 1,370 acres in oats, 1,111 acres in rye, and 386 acres in barley. The area under green and root crops shows a decrease of 7,089 acres chiefly due to a decline of 5,726 acres in the area of potatoes. Mangal and turnips show a decrease of 749 acres, cabbage a decrease of 500 acres, and rape a decrease of 329 acres. Flax has decreased by 4 acres.

CHANGES IN THE COUNTY TILLAGE AREAS.

An increase in the tillage area of both corn and green crops is seen in the following counties:—Carlow, Dublin, Kildare, Queen's, and Wexford.

An increase in the corn crops, but a decrease in green and root crops is seen in the following counties:—Cork, Kerry, Waterford, Monaghan, Leitrim.

A decrease in both corn and green crops is seen in the following counties:—Kilkenny, King's, Longford, Louth, Meath, Westmeath, Wicklow, Clare, Limerick, Tipperary, Antrim, Armagh, Cavan, Donegal, Down, Fermanagh, Londonderry, Tyrone, Galway, Mayo, Roscommon, and Sligo.

Fruit.—There is an increase of 831 acres or 7·8 per cent. in the area under fruit in 1907. The increase amounts to 716 acres in Ulster, 89 acres in Leinster, 17 acres in Munster, and 9 acres in Connaught.

HAY.

The total area of hay in 1907 is returned at 2,281,263 acres, a decrease of 48,753 acres, or 2·1 per cent., as compared with 1906. This decrease has taken place chiefly in the area of permanent meadow for hay—the area grazed increasing at the expense of the area mown. There is also a small decrease in the area of first year's hay, but a considerable increase in the area of second and third years' hay. The following statement shows the area in 1906 and 1907 under the different classes of hay:—

—	First Year's Hay.	Second and Third Year.	Hay from Permanent Meadow.
1906,	522,375	257,873	1,349,068
1907,	512,601	314,100	1,454,662
Increase or Decrease,	- 8,774	+ 56,227	- 95,205
Percentage,	1·9	21·3	6·1

The decrease in the area under hay has taken place in each of the four provinces, but chiefly in Leinster and Connaught.

Pasture.—The total area of pasture amounted in 1907 to 12,431,586 acres, as compared with 12,307,236 acres in 1906, an increase of 124,350 acres. This increase is due, on the one hand, to the decrease in the area of crops and of hay, and, on the other hand, to the decrease this season in the area of turf bog, and of mountain land returned as barren or "non-grazed." There are certain areas which it is always difficult to classify, and which one year may be returned as "grazed" land, and another year may be returned as turf bog, or barren mountain, but the grazing value of these areas is small, and the important increase or decrease in pasture is the extent to which the area of crops and of hay has increased or decreased. The increase in pasture, due to the shrinkage both in crops and in hay, would appear to be, in 1907, approximately 89,000 acres.

The Increase in the Grass Area.—Apart from the changes in the area of rough mountain grazing, the net increase however, in the area under grass, whether for hay or grazed only, is shown by the change in the area of corn and green crops, flax and fruit. The returns thus indicate in 1907 a net increase in the area of grass amounting to approximately 40,000 acres—the area of hay having decreased, while the area under pasture has increased.

The following table shows the acreage of the several cereal and green crops, and of flax and hay during each of the past five years:—

Horses, Mules, Asses.—The total number of horses has decreased by 8,389. There is a decrease in Leinster of 988, in Munster of 2,506, in Ulster of 2,841, and in Connaught of 2,054. The number of mules and jennets has decreased by 1,158. The number of asses shows a decrease of 5,298, the number in Munster having decreased by 2,315, and in Leinster and Ulster by 1,017 and 1,207 respectively.

Cattle.—The total number of cattle shows an increase of 35,910. There is an increase in Leinster, Munster and Connaught of 14,714, 16,445 and 19,756 respectively, and in Ulster a decrease of 15,005. The number of milch cows, including heifers in calf, is 1,560,801, showing an increase of 64,517 as compared with 1906.

Sheep.—The total number of sheep has increased by 101,163. There is an increase in Leinster of 59,126, in Munster of 10,763, in Ulster of 23,683, and in Connaught of 7,591.

Pigs.—The number of pigs shows an increase of 72,536, the number in Leinster, Munster and Connaught having increased and in Ulster decreased. Leinster, Munster and Connaught have increased by 25,780, 47,227 and 11,757 respectively, and Ulster has decreased by 12,228.

Goats.—The number of goats has decreased by 19,957, which is chiefly due to a decline of 10,979 in Munster; Leinster, Ulster and Connaught show decreases of 3,909, 4,682, and 387 respectively.

Poultry.—The number of poultry returned in 1907 amounts to a total of 24,318,752. The number in Leinster is 5,095,885, in Munster 5,568,818, in Ulster 9,265,988, and in Connaught 4,388,061. These figures show a great increase, especially in Ulster and Munster, as compared with 1906. It is probable that this increase is, in a great measure, due to a more complete record of young birds having been made in 1907.

SCUTCHING MILLS.

In connection with the area under Flax, I beg to state that the number of Scutching Mills enumerated as working in 1907 is as follows:—In the province of Ulster, 699; Leinster, 1; Munster, 2; and Connaught, 3; making a total of 705 for Ireland.

The members of the Royal Irish Constabulary and the Metropolitan Police, who acted as Enumerators, rendered valuable assistance in carrying through the work of inquiry and enumeration in the several districts.

I have the honour to be,

Sir,

Your obedient servant,

W. G. S. ADAMS,
